

**Amendments to the Specification:**

Please replace the paragraph beginning on page 3 of the published International Application (WO 2004/047710 A1) with the following amended paragraph:

5

Finally, it is to be noted that US patent 4,5a—50d09,513 to Lasley discloses a 'hyperbaric chamber' that appears to be suitable for home use by a person without assistance. However, the device is a bag into which the user climbs like a pair of angler's waders, securing the opening around the upper part of the body (below the shoulders and not including the arms) to form a seal. The bag is then inflated with oxygen-enriched air. Obviously this device is not, in fact, a hyperbaric chamber in the normal sense – that is, one intended for pulmonary oxygenation.
